

# ZEFANDION BENAYA TEJA

+6283824383679 | zefandion03@gmail.com | <https://www.linkedin.com/in/zefandion> | <https://zefandionbenaya.vercel.app>

Innovative Artificial Intelligence Engineer and recent graduate specializing in predictive modeling, deep learning architectures, and Generative AI. Adept at conducting independent research, end-to-end data preprocessing, model training, and API deployment for real-world solutions. Possesses a strong background in technical documentation, code review, and remote cross-functional collaboration. Passionate about developing scalable, production-ready AI and automation pipelines to streamline complex workflows, mitigate risks, and enhance operational efficiency.

## Professional Experience

### Bandung TalentSource - Bandung, Indonesia

Sep 2025 - Apr 2026

#### AI Researcher

- Served as a key contributor to the web overhauling initiative, researching and implementing Generative AI, Large Language Models (LLMs), and Robotic Process Automation (RPA) technologies.
- Conducted technical exploration of various AI tools, focusing on seamless integration into a functional, user-facing prototype.
- Processed, validated, and labeled proprietary company data and designed robust testing frameworks to evaluate the performance and safety of LLMs during data preparation.
- Bridged technical concepts with design and content requirements to deliver a cohesive, scalable product.

### Universitas Katolik Parahyangan - Bandung, Indonesia

Sep 2025 - Feb 2026

#### Assistant Lecturer

- Mentored a practicum class of 35 students, simplifying complex programming logic and web development concepts.
- Conducted rigorous weekly code reviews, delivering constructive feedback to enforce clean code practices and optimize performance.
- Documented technical processes, assisted lecturers in evaluating assignments, and provided customized troubleshooting support.

### LSP Informatics Program, SMAK 1 BPK Penabur - Bandung, Indonesia

Feb 2026 - Present

#### Teaching Assistant

- Entrusted to substitute for the primary university lecturer, taking full responsibility for classroom management and delivering technical curriculum to high school students.
- Instructed students in fundamental web development using HTML, CSS, and JavaScript, ensuring a strong grasp of frontend programming concepts.
- Taught introductory game logic and algorithmic thinking using Scratch and Python, breaking down complex technical workflows into easily digestible concepts.

### Bandung TalentSource - Bandung, Indonesia

Jul 2026 - Present

#### AI Engineer

- Architecting and developing an autonomous intelligent system capable of executing complex workflows and automating decision-making processes.
- Utilizing n8n to design and orchestrate end-to-end AI pipelines, seamlessly integrating Large Language Models (LLMs) with external APIs and data sources.
- Streamlining operational tasks through node-based workflow automation, significantly enhancing system efficiency and reducing manual intervention.

## Education

### Universitas Katolik Parahyangan - Bandung, Indonesia

Sep 2022 - Jul 2026

#### Bachelor of Informatics, 3.21/4.00

- Undergraduate Thesis: Makespan Prediction in Flow Shop Scheduling Using LSTM (Long Short-Term Memory)
  - Developed an end-to-end predictive deep learning model using LSTM neural networks to accurately forecast production completion time (makespan) in flow shop scheduling.
  - Conducted rigorous data preprocessing, feature engineering, and model evaluation utilizing Taillard's benchmark dataset to optimize sequence prediction accuracy and prevent overfitting.
  - Successfully deployed the finalized predictive model into a production-ready Streamlit web application, demonstrating practical end-to-end ML pipeline execution from raw data to a user-facing interface.
  - Utilized Python, Pandas, NumPy, Scikit-learn, and Deep Learning libraries for data transformation and statistical modeling.

### Coding Camp 2025 by DBS Foundation

Feb 2025 - Jul 2025

#### Certificate in Machine Learning Engineer Trainee

- Participated in an intensive 6-month training program covering the entire machine learning lifecycle, from fundamentals to deployment.
- Mastered Python, TensorFlow, data analysis, and deep learning techniques.
- Successfully completed the Capstone Project: "Diabetes Prediction Application using TensorFlow".
  - A full-stack machine learning project to predict diabetes risk in patients based on various health attributes. The project features a deep learning model built with TensorFlow, served via a back-end API created with FastAPI, and accessed through an interactive web interface built with SolidJS.

## Proficiencies

---

- **AI::** Machine Learning, TensorFlow, Scikit-learn, Deep Learning, Data Preprocessing, Data Analytics, Feature Engineering, Data Scraping, Generative AI, LLMs, Prompt Engineering, AI Agents, AI Workflow Automation, n8n, Computer Vision, Natural Language Processing (NLP) and Predictive Modeling.
- **Programming Languages::** Python(Pandas, NumPy, Scikit-learn), Java, JavaScript, C.
- **Web Development & Deployment::** API Integration, JSON, Streamlit, Vercel, HTML, CSS, React, Node.js, Java Spring Boot, SolidJS.
- **Databases::** SQL, PostgreSQL, MongoDB.
- **Version Control::** Git, GitHub.
- **Infrastructure & Scripting::** Familiar with Linux, Docker, Shell/Bash.
- **Soft Skills:** Technical Documentation, Mentoring, Problem Solving, Cross-functional Collaboration, Remote Work Readiness.
- **Languages::** English (Intermediate), Indonesian (Native).
